

Masonville Cove

Urban Wildlife Refuge Partnership

DREDGED
MATERIAL
MANAGEMENT
PROGRAM

LOCATION

Middle Branch
of the Patapsco
River in
Baltimore City

Open to the public, this popular birding and fishing spot is the nation's first Urban Wildlife Refuge Partnership.

Masonville is home to over 300 species of birds and animals. Educators provide an abundance of programs that allow people to interact with wildlife, inspiring the next generation of environmental stewards.

Masonville serves an important role in education, community engagement, and outdoor recreation, but physical access to the site can be challenging.

Masonville Cove is a green oasis in Baltimore for wildlife and people to enjoy. The campus features nearly 50 acres of environmentally remediated land, walking trails for bird watching, and a pier for fishing or launching kayaks, all protected under a conservation easement. The campus also includes an Environmental Education Center that serves as a hub for educational programs for area schools and community members. The Port partnered with Living Classrooms Foundation and the National Aquarium to operate the facility and engage surrounding communities. U.S. Fish and Wildlife Service joined the partnership in 2013 when Masonville Cove was designated the nation's first Urban Wildlife Refuge Partnership.

Tied to the construction of a dredged material containment facility by Maryland Port Administration (MPA), Masonville Cove is a refuge and gateway, reconnecting adjacent communities to the water by providing public access to the shoreline, piers, and trails. However, physical access to the site remains limited. MPA is working to address this via creation of a shared use path.

Masonville Cove Connector

As the nation's first Urban Wildlife Refuge Partnership, Masonville Cove is well established as an educational and recreational community treasure, but gaining access to the site can be challenging. Consistent with its promise to restore access to the waterfront for the communities surrounding the Masonville DMCF, MPA and other partners have secured grants totaling \$2.86 million from the Federal Highways Administration Federal Lands Access Program (FLAP) and USFWS to design and partially construct a shared use path connecting Masonville Cove to the Gwynns Falls Trail and adjacent communities.

Why Build the Connector to Masonville Cove?

- Establish safe, convenient, and equitable access
- Connect local communities to a unique recreational asset
- Integrate Masonville Cove into the larger outdoor recreational landscape in Baltimore

"I'm happy to hear the connector is happening in this community and this community hasn't been forgotten."

– Community Member

PART OF THE LARGER COMMUNITY

Once complete, the Masonville Cove Connector will link with the existing Gwynns Falls Trail and the proposed Baybrook Connector for a total of over 20 miles of trails, providing walking and biking connectivity with:

- Dozens of neighborhoods
- A scenic and historic greenway
- Regional hospital and wellness facilities
- Light Rail station

NEXT STEPS

- Identify and engage partners
- Seek input and feedback
- Continue planning and design
